

# ABCA Design Design Process

## Tell me about the process?

- **First appointment:** After the discovery call, we will set up a time to meet in your home. There, we will discuss Form, Function, Products, Color and any other important aspects of your home. We ask many questions while taking lots of notes and pictures too. Pay a small retainer fee, or \$350 consult fee. If you have a fixed investment into your home, and we feel we can meet that request with our designs, then we set up a second appointment.
- **Second Appointment:** Your Design and Purchasing Presentation. This is a very exciting day for most clients. We go over all the details and elements of the space. You may see a design board, visual presentation, finishes, and fabric samples. Every item and detail we have chosen is current, in stock and priced. Dont worry, we stay within your investment level and have plenty of beautiful selections for you. Our goal is making sure you will love it! At this appointment, pay 60% down of your total purchase so we can get your final design started.
- **Third Appointment:** Installation Day! Now comes the fun! Usually this is our last visit. Along the way, we will have given you weekly updates, just to tell you how your project is moving. But once everything is here, we set up a time for installation and the big reveal. Once you see it, we expect you to love it!

## How and when do you accept payment?

Most appointments require a deposit or payment. We always appreciate cash and checks. We accept credit cards upon request.
